Mr. Markku Villikka,  
FIG Director  
International Federation of Surveyors  
FIG Office  
Lindevangs Alle 4  
DK-2000 Frederiksberg  
Denmark

Dear Mr. Villikka,

RE: Professor Yerach Doytsher's Candidacy as Vice President of FIG

The Israeli Association of Licensed Surveyors has decided to nominate Professor Yerach Doytsher as a candidate for Vice President of FIG for the 2006-2010 period.

Professor Doytsher holds BSc, MSc and PhD degrees in geodesy, and is a Professor of Mapping and Geo-Information Engineering. He is the head of the Department of Transportation and Geo-Information Engineering (including heading the Mapping and Geo-Information Engineering undergraduate and graduate programs) at the Technion, which is located in Haifa, Israel. He has a long history of practical engineering and land surveying experience in the public and private sectors in Israel and has significantly contributed to our profession. In the last decade he developed new standards and ideas concerning how the profession should be taught. He contributed immensely towards arranging the continuing study of our profession in Israel. It is worth mentioning his huge research experience in the different aspects of cadastre, mapping and surveying, mainly in topics such as "Turning the historical non-accurate cadastre into a modern accurate analytical cadastre". He had also spearheaded the research towards solutions for registering lands in a three-dimensional cadastre method.

Professor Doytsher is extensively involved in FIG matters. He is the Israeli national delegate to commission 3 for many years and has participated in many FIG conferences and workshops, sharing his experience by lecturing on his specializations and expertise.

Professor Doytsher is personally and professionally appropriate to the position of Vice President of FIG. Being elected as Vice President would undoubtedly contribute immensely to FIG and the international community of surveyors. The Israel Licensed Surveyors Union Association will give full administrative, professional and financial support to Professor Doytsher in fulfillment of his task, once he will be elected.
