

A photograph of a woman standing in a shallow river, carrying a young child on her back and a large white bag. She is wearing a patterned sarong. The river flows over rocks, and the banks are covered in dense, lush green tropical vegetation. The scene is brightly lit, suggesting a sunny day.

Secure Land Tenure in the South Pacific Region – Developing the Toolkit

Spike Boydell
Land Management, USP

Whosland

At dawn one morn
After eight weeks of sailing
The Europeans landed
On the gold, sandy beach.

After praying
They made their way
Inland,
With their flags in their hands
And an empire on their minds.

Soon they came across a small
village,
All the people came out to see
them,
The villagers thought they had
come with great knowledge
And wisdom from afar.
Having never seen Europeans
before
This was new and exciting.

When the captain of the ship
Met the elder of the village
He still had a flag in his hand
And an empire on his mind.

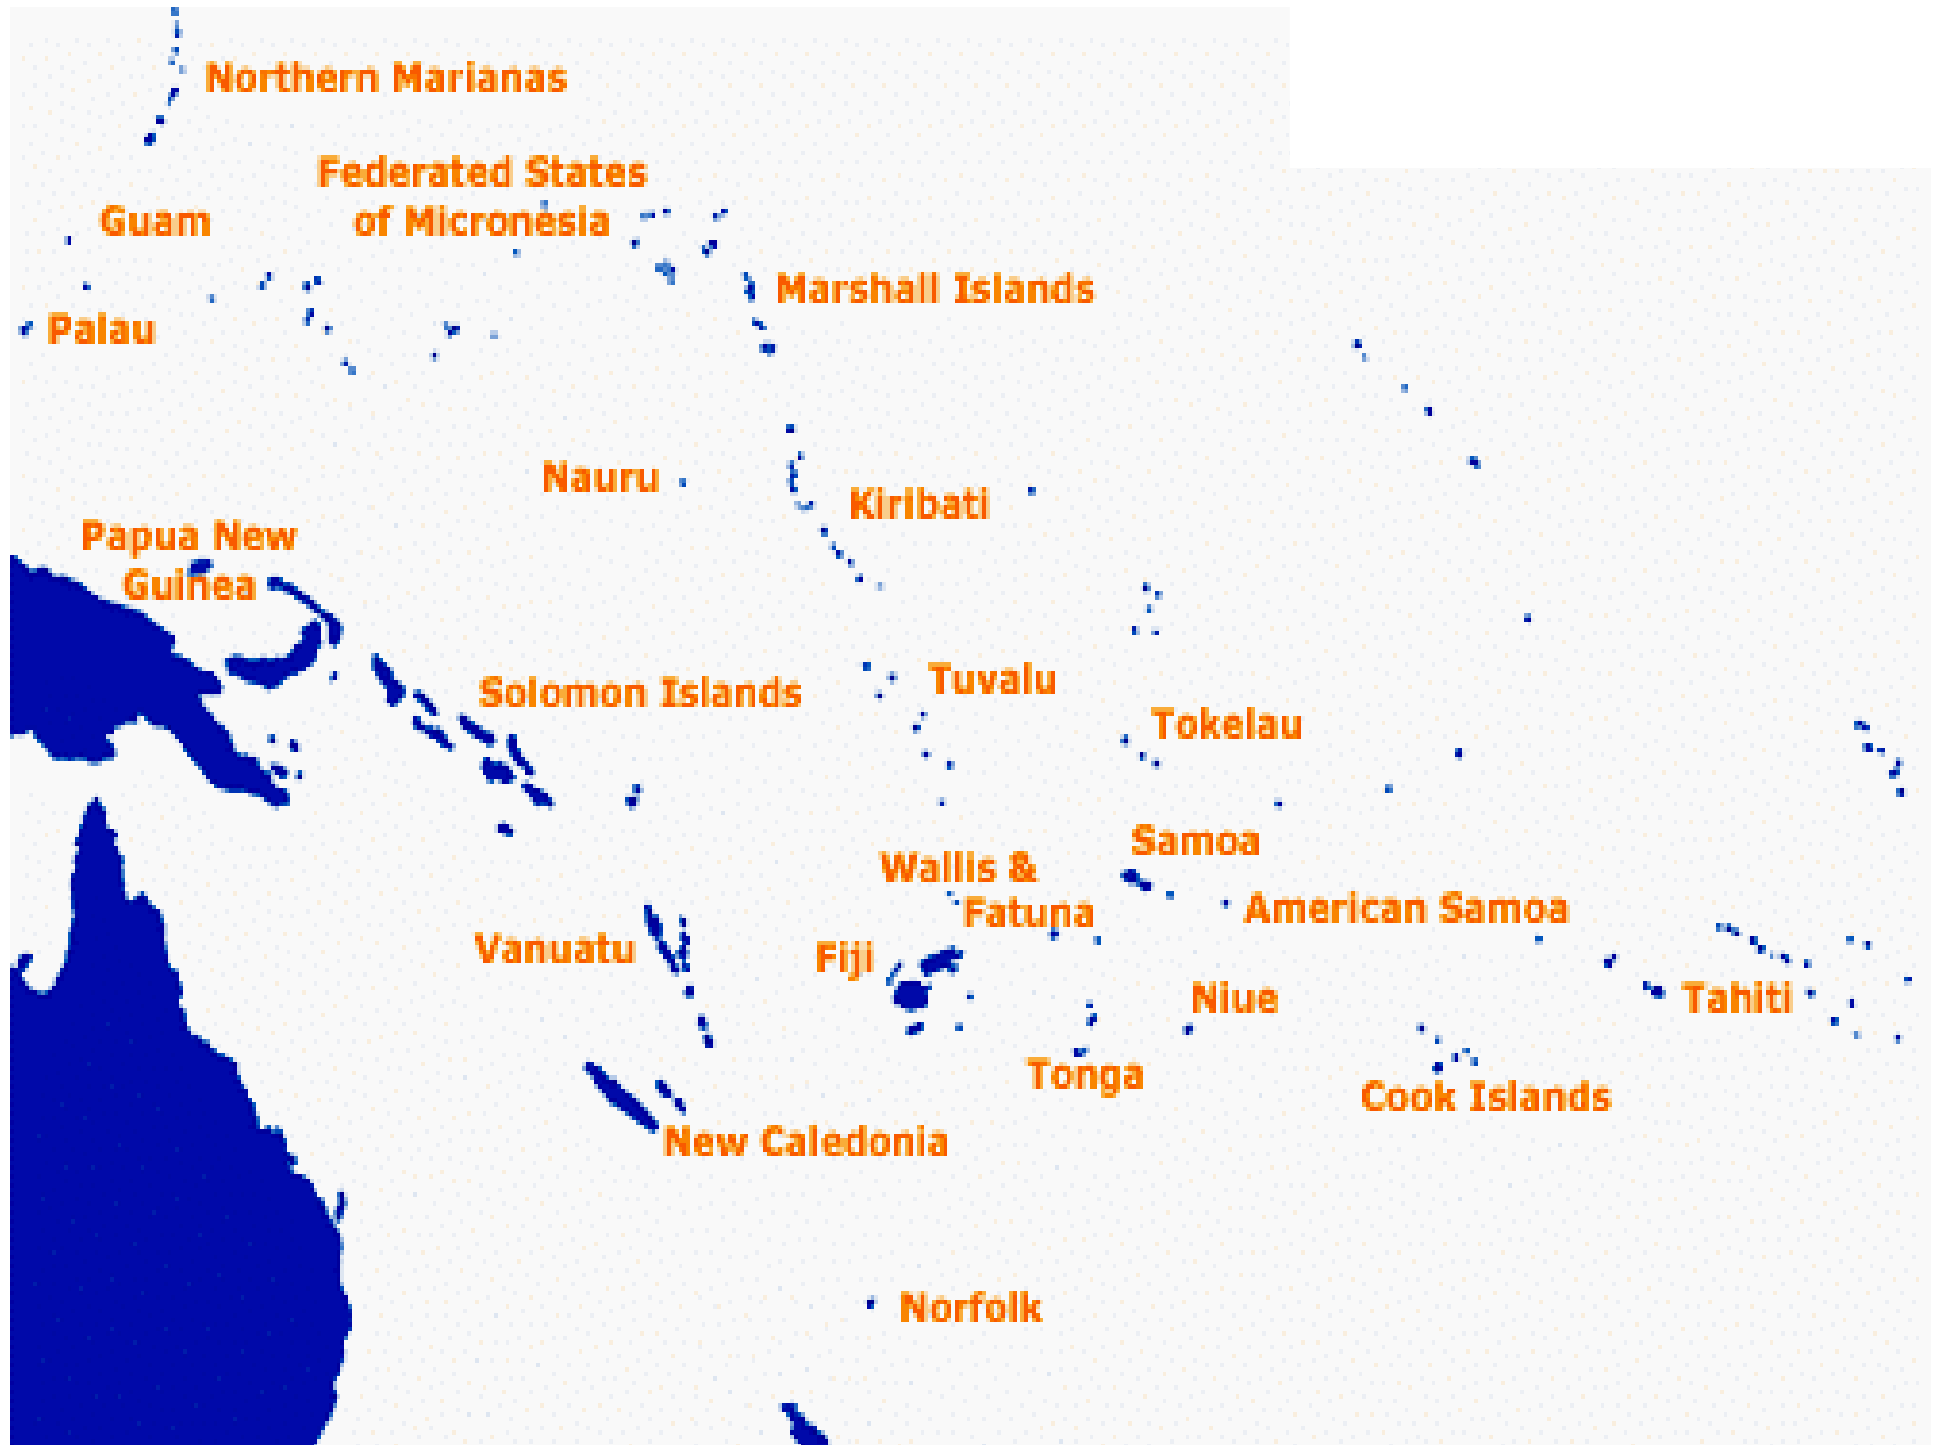

'What did you call this land before
we arrived?'
said the captain.

'Ours'
said the village elder,

'Ours'.

Pacific Island Nations in context

- n 12 nations – 22 nations
- n Unique (geographic, biological, sociological & economic)
- n 30 million km² ocean
- n 550,000 km² land & 7.5 million pop.
- n (87,587 km² land & 2.7 million pop.)
- n 2,000 languages

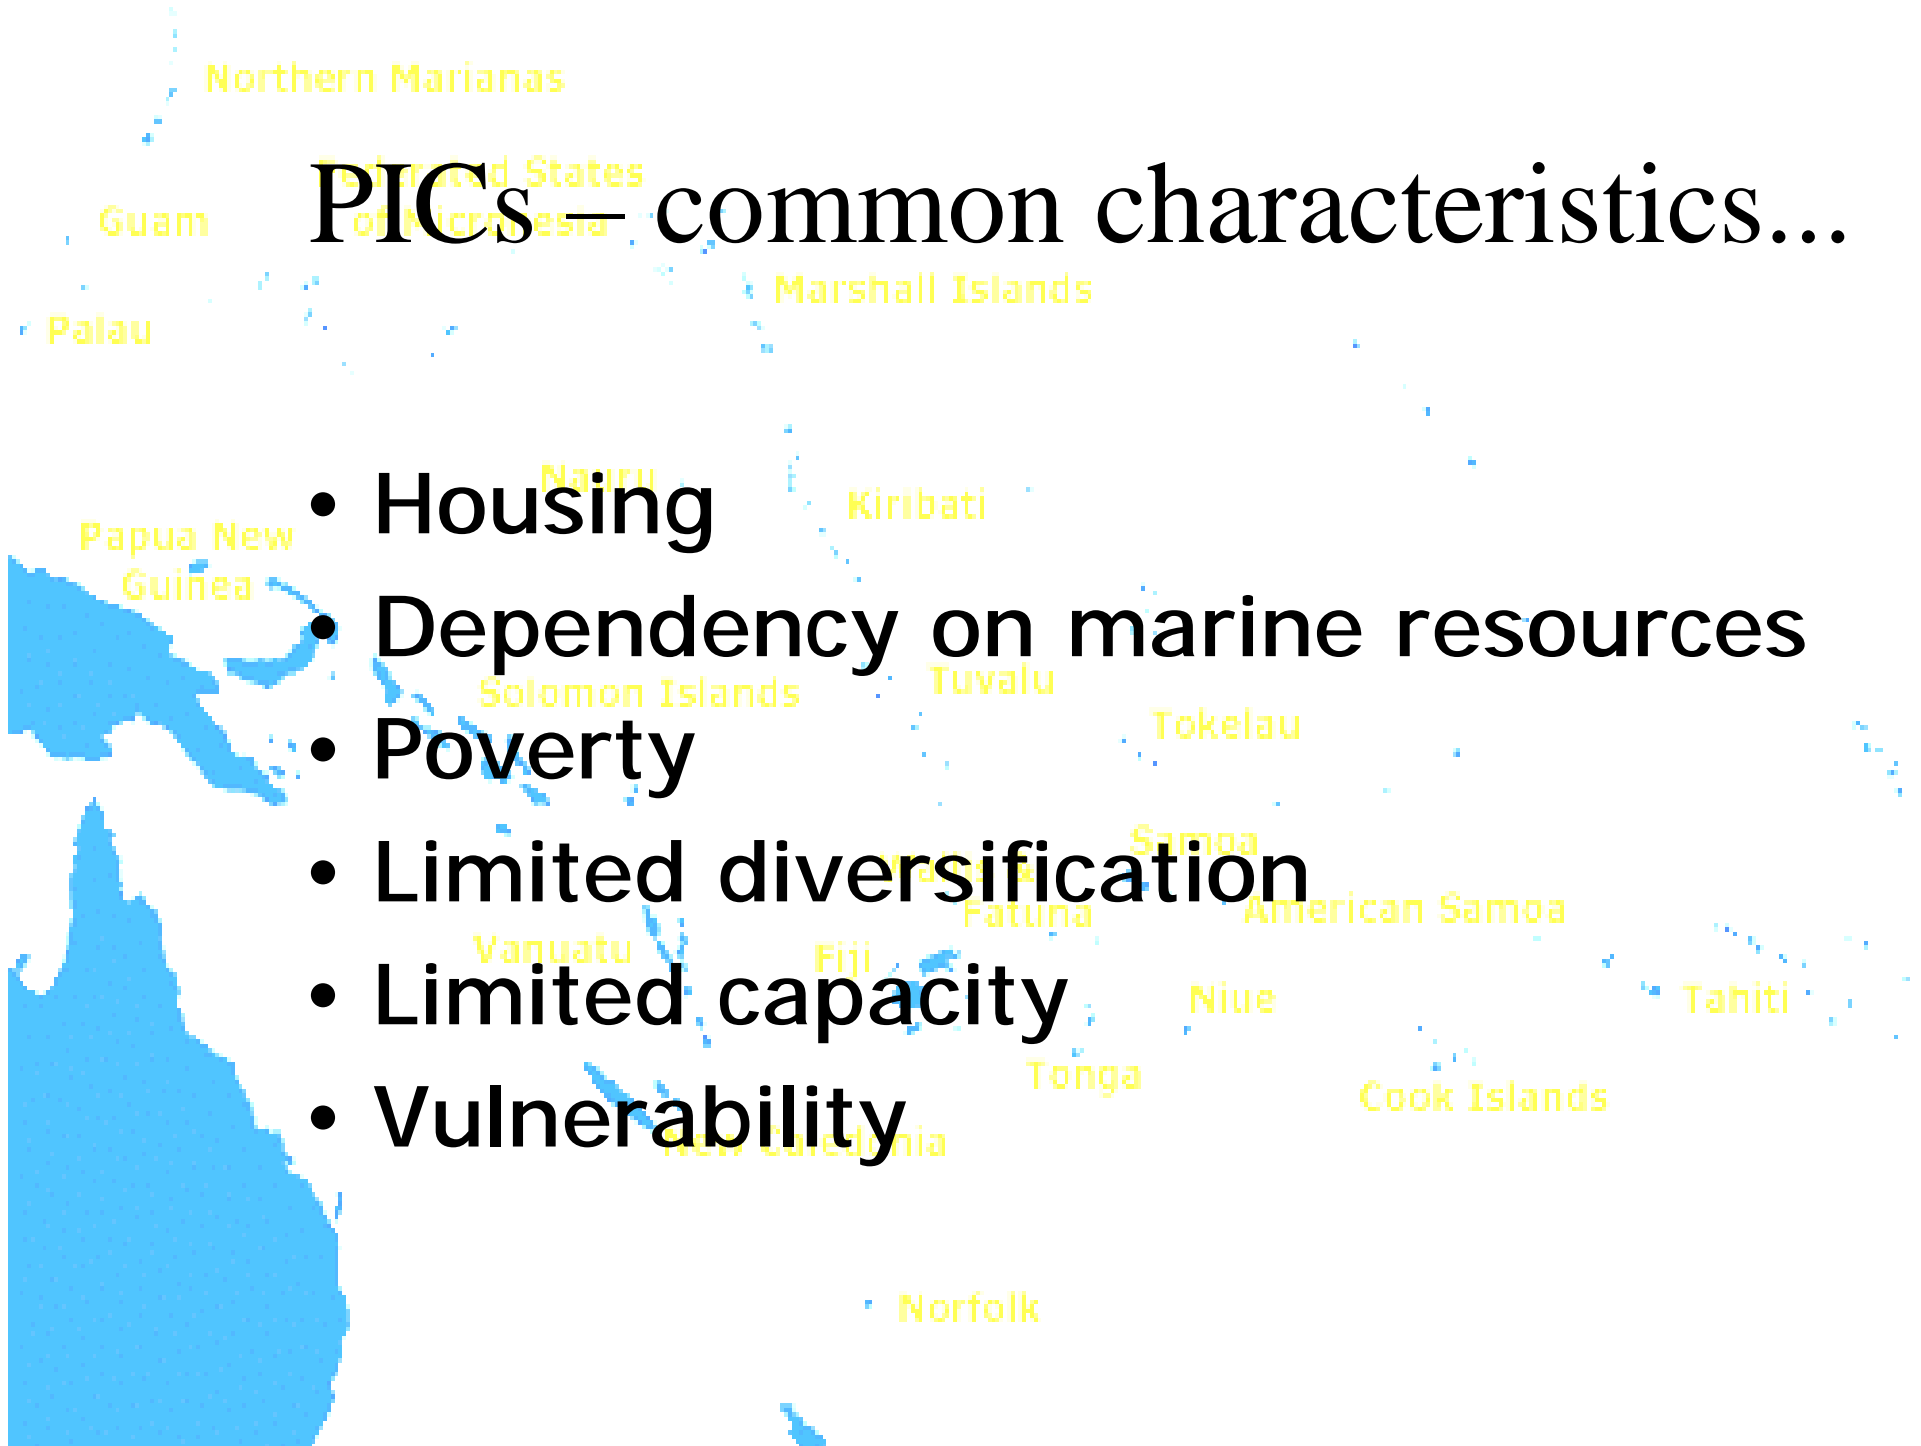

PICs – common characteristics

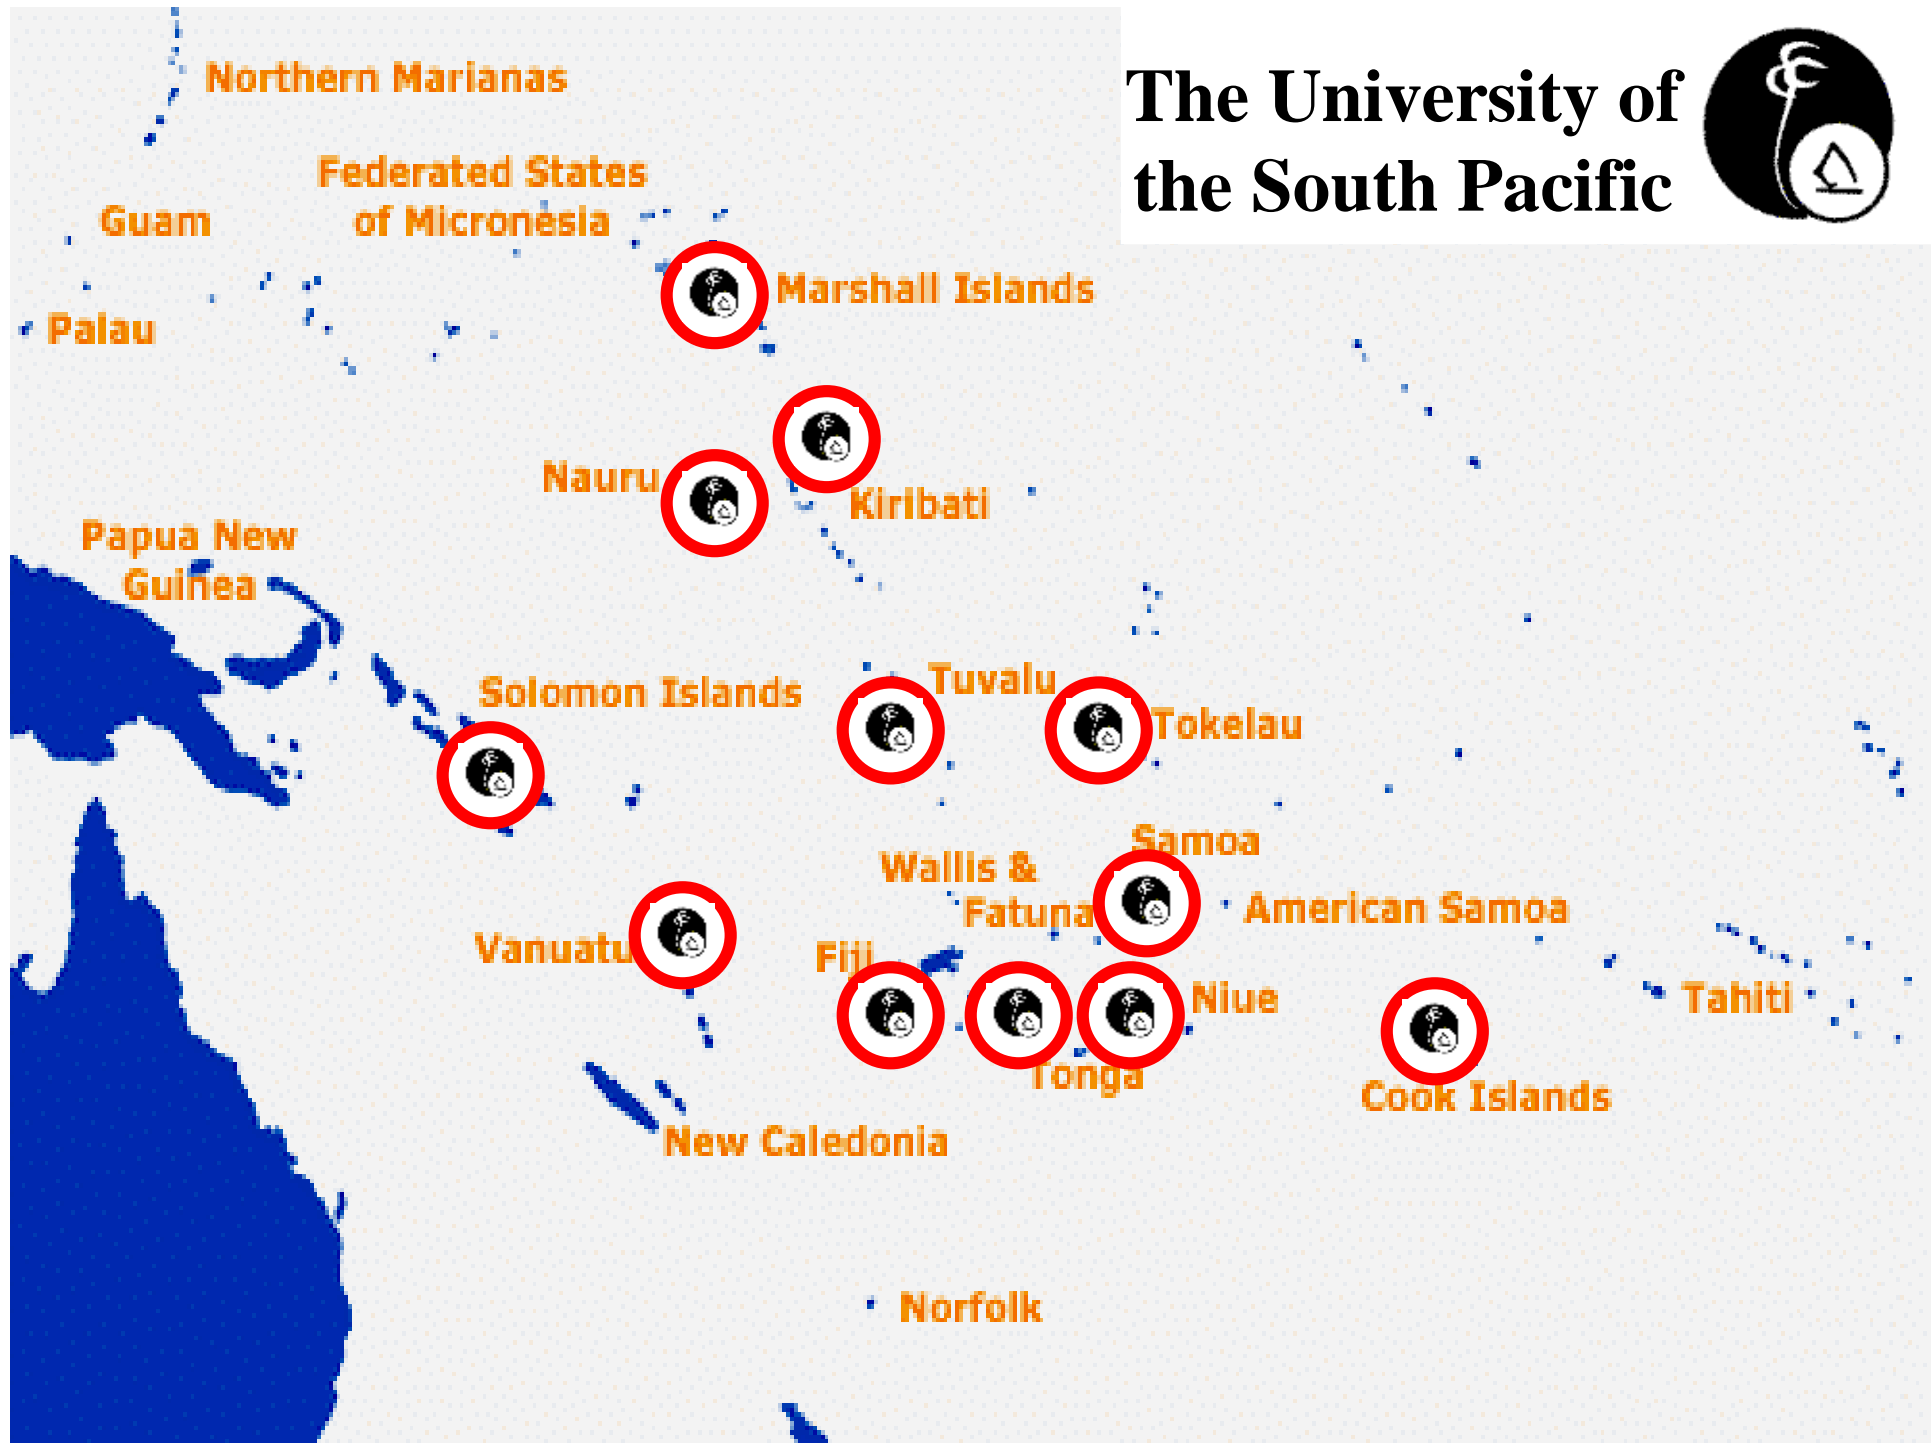

- Remoteness & geographic isolation
- Environmental fragility
- Rapid population growth
- Limited land resources
- Dysfunctional/immature land markets
- Access to land (83-100% customary)

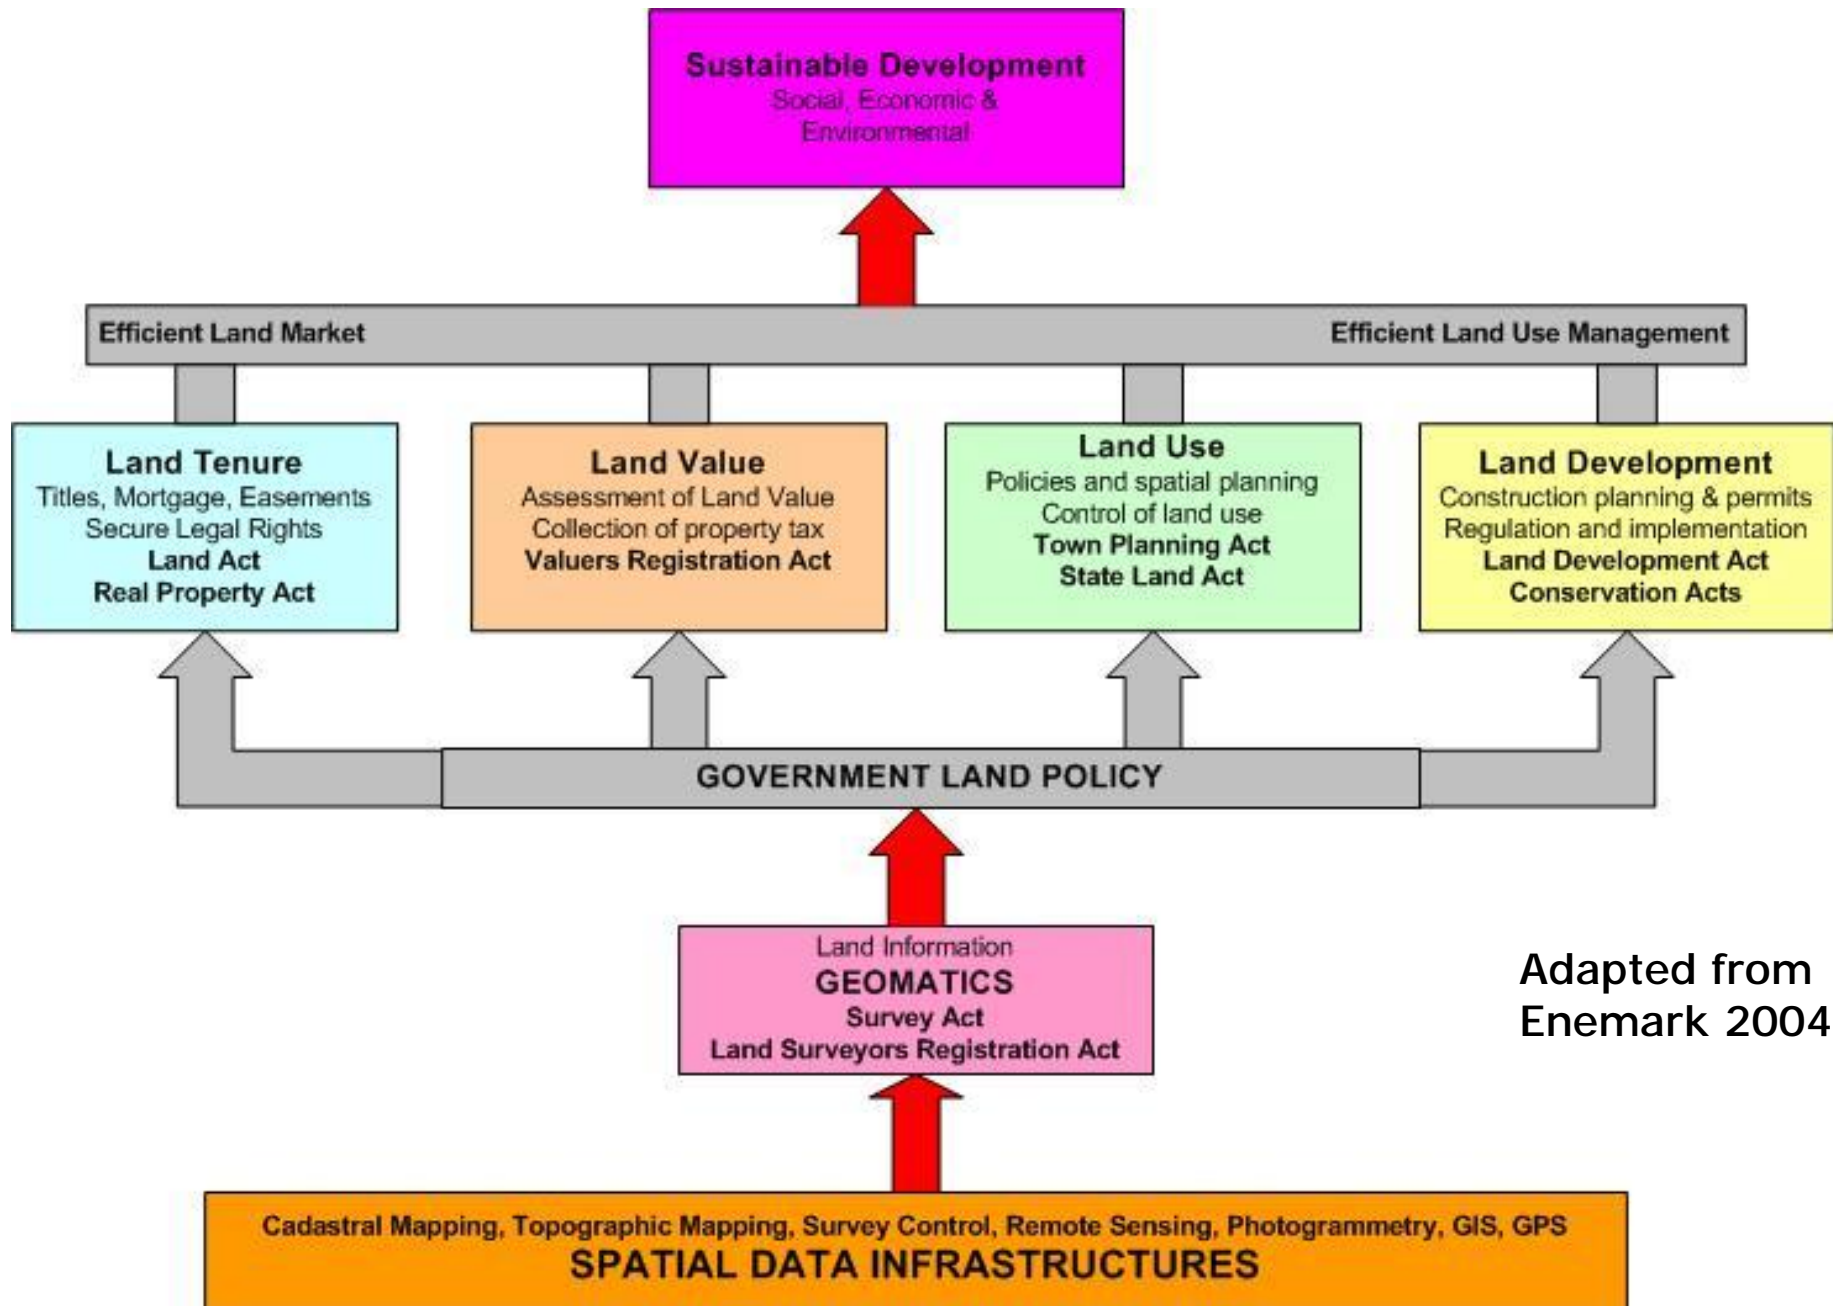

PICs – common characteristics...

- Housing
- Dependency on marine resources
- Poverty
- Limited diversification
- Limited capacity
- Vulnerability

Enemark 2004

The background image shows a group of people, including men and women, sitting on the floor inside a traditional wooden structure with a thatched roof. They appear to be in a meeting or discussion. The structure has wooden poles and a thatched roof. The people are dressed in casual, traditional-style clothing. The overall atmosphere is one of a community gathering.

Challenges of Implementing Land Reform for Secure Access in the Pacific Region (1)

- Complexity
- Needs high level support
- Accommodate economic aspirations whilst respecting socio-cultural, religious and environmental values
- There is no property in nature
- Political governance
- Political will
- Different frameworks for different uses
- Distributive justice

Challenges of Implementing Land Reform for Secure Access in the Pacific Region (2)

- Process protocols
- Adaptive strategy rather than structural reform
- Community (grass roots) focus
- Education about property rights and policy change
- Balance commodification versus cultural value
- Cost benefit analysis
- Customary tenure versus individual rights
- Quantity versus quality

Rural Women's Access to Land – Anupam Sharma

Case study of Fiji:
A Hindu
Perspective

Rural Women's Access To Land In Fiji : A Hindu Perspective

Conceptual Framework of the Issues

Gender Analysis

- n Qualitative Research Solutions N5 (Non-numerical Unstructured Data Indexing searching and Theorising)
- n content coding for analysis
- n Findings:
- n majority unaware of human & constitutional rights
- n most unaware of feminist theory
- n almost half experienced domestic violence

Gender Analysis

- n all - Hindu religion - superiority to men
- n all - Hindu culture / traditions are biased towards men
- n small minority wanted change in such culture
- n others - content - present culture

Gender Analysis

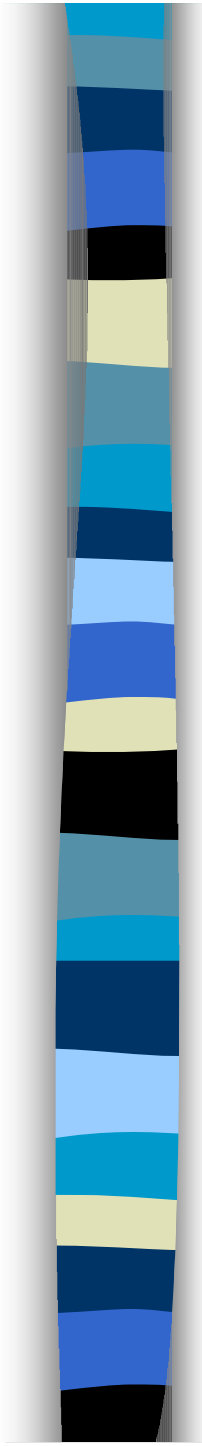

- n all - women - subservient status
- n all - status is improved with seniority
- n all - high status due to involvement in religious club
- n all - gained access to land through relationship with men as daughters, sisters, wife, mother
- n all - laboured on the farm
- n few received remuneration

Gender Analysis

- n women - not regarded as farmers but as farm assistants
- n most ownership title & leases - remain under name of men
- n all - land rights for granted - developed the perception that land is still a male domain
- n importance of women's access to land is yet to be realised in Fiji

- 
- n “Potential conflict between culture & feminist theory is not only a real concern to Indo-Fijian Hindu women but to all Pacific women. Culture should be scrutinized in order to identify & expose inequalities between men & women. Culture should evolve with time to suit lifestyle of people. Hence, it becomes the responsibility of the entire society to develop our cultures in such a way that it neither discriminates against any disadvantaged group nor deny them their basic human rights”

(Sharma,A. 2002)

Customary Land Mobilization

Auluta Basin

**Tribal Lands Unit
Dept. Lands & Survey**

With acknowledgement to Alec Rukia, Secretary of Tribal Lands,
Government of Solomon Islands.

Background

The Customary Lands Unit was established in January 2003

Objective

Is to devise a comprehensive and cost effective system for defining customary Land holding groups.

Customary Land Records Act

The only legal tool we have available that relates to the nature of our objective is the Customary Land Records Act... The Act, although was passed by Parliament in 1994, had never been used and one obvious reason is the cost factor (administration & proceedings).

Customary Land Mobilization - Auluta Basin

Mission:

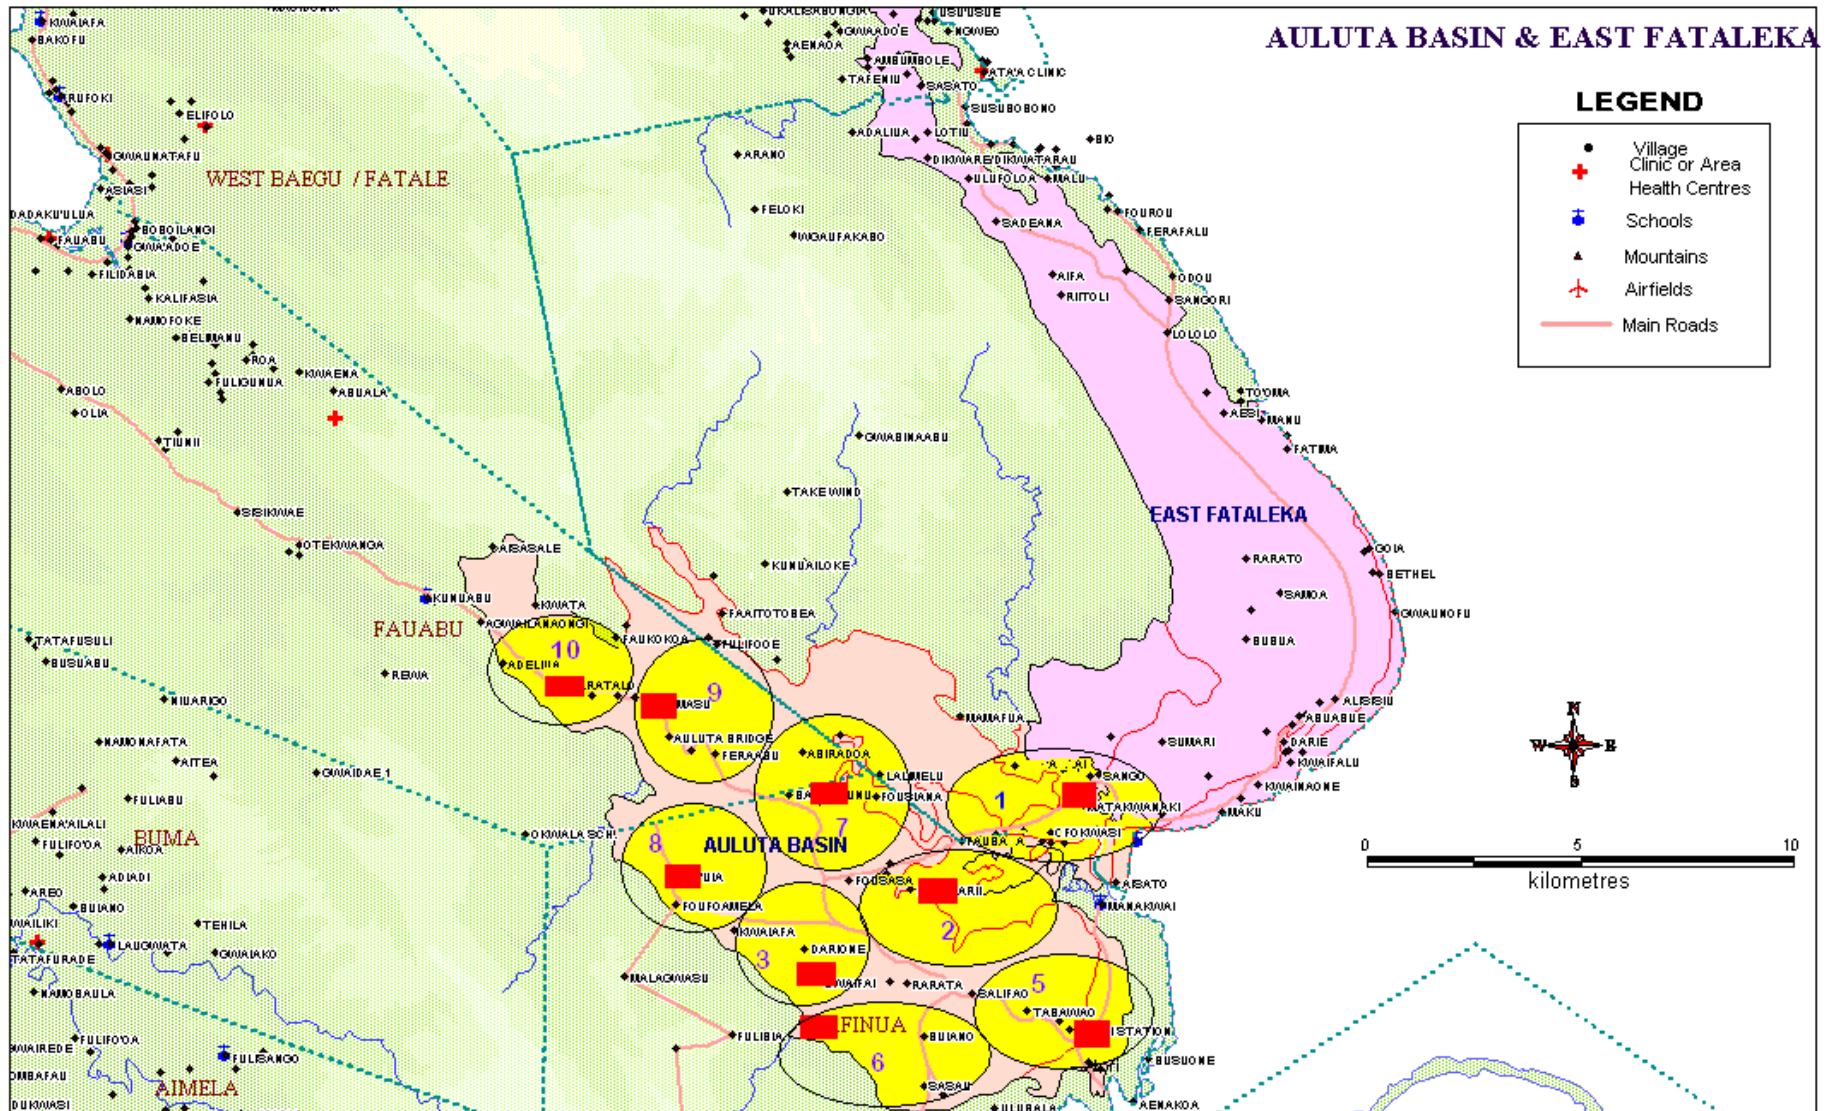

1. To record how many different customary Lands exist within the Auluta Basin?
2. Where are the boundaries?
3. Who hold rights to the ownership of these lands?
4. What is the current status of these lands in terms of disputes

In reality we are only taking a “stock-take” of customary lands in the Auluta basin. What do we do with these Records?? (to assist in speeding up the Acquisition Process).³⁵

Land Records witnessed by House of Chiefs

Objective of Customary Land Recording ?

- To establish a legally recognized Customary Land Register (Record) that contain details of all the land recorded including the tribal genealogy, land boundaries and Land Trust Boards (Authorities).

Where do we go from here??

Is there a need for a third dimension of time?

= area where a consensus is reachable even if stakeholders values diverge

Source: Vodoz (1994)

A photograph of three construction workers wearing blue hard hats and safety vests, looking at a document. The image is semi-transparent, serving as a background for the text.

Directions

- Analytical **Tools** rather than Historical **Rules**
- Work in progress
- Education – particularly property rights
- Minimise the conflict
- A worthy starting point...

Directions

There is a broad need for a systematic re-appraisal of the very fundamentals of property in a manner that will facilitate appropriate regional solutions. To be effective, local property institutions will need to respect local culture and tradition, as well as incorporate elements that recognise the needs and dignity of persons beyond the confines of the tribal owners. It is only in this way that the broader level of co-operation that is nascent within Western commerce and culture may be made available to customary people. Part of this exploration of property necessarily includes investigations into regional issues and their solutions.
